# RCC Repair

Reducing wind turbine downtime from months to weeks.

Used to be, if you had a failure in a V-47 RCC, you'd have to send it all the way back to Denmark for repair. Not any more. With National Switchgear's DOMESTIC Rotor Current Control Power Unit (RCC) repair service, repairs that used to take months now can be completed in a few weeks.

## National Switchgear is your wind turbine source for:

- Electronic Repairs - rotor current control units, generator control units, etc
- Spare Parts - to enable quick and convenient service and maintenance, we provide all the main components for all modern turbines AND we renovate components no longer manufactured.
- Commissioning - new system inspection ensuring compliance to specifications and safety requirements.
- Manufacturing - custom bus design upgrades, custom fabrication of cells and cabinets, relay protection and upgrades.
- Service - preventive maintenance, daily operation, minor repairs, adjustments and upgrades, and ancillary services.
- Troubleshooting - nuisance turbine tripping, distribution feeder voltage unbalance and regulation, capacitor bank switching failures, turbine transformer failures.

## Who we are:

National Switchgear is a provider of electrical power equipment and services supporting the industrial and utility markets. **NSG**
